

“New Quizzes” in Canvas

What is the “New Quiz” tool in Canvas?

- The New Quiz tool is an alternative to the “Classic Quiz” tool – it can create quizzes and surveys. It looks and feels a bit different from Classic Quizzes. *see [Frequently Asked Questions About New Quizzes](#)*

How does it differ from “Classic Quizzes”?

- Both tools have similar settings and question types. The New Quizzes tool is still under development, so continues to improve. Currently, one of the features of New Quizzes that may be useful is the improved printing options which can allow you to print a blank quiz/exam or to print an answer key. The New Quizzes tool has a few new question types and the quiz moderation settings are easier to use. However, New Quizzes is still under development. *see [Feature Comparison](#)*

Do I have to switch to New Quizzes?

- No. Right now there is no set end date for Classic Quizzes and the New Quizzes tool is technically still in “beta” mode as features continue to be developed or fixed. As the New Quizzes tool reaches a point that it supersedes Classic Quizzes in all functions, that may change in the future -- but you will have plenty of time to learn the new tool and convert any older quizzes if that time comes.

Can I convert Classic Quizzes to New Quizzes?

- Yes, and there are a variety of ways to do so. Keep in mind that while you can convert a Classic Quiz to a New Quiz, it doesn’t work the other direction so be sure you are ready once you make that conversion. *see [How Do I Migrate a Canvas Quiz to New Quizzes](#)*

Can I get help with any of this?

- Yes! Contact Sharon Birch in the TLDS, or check out any of the resources highlighted here.
