

## SITE POLICY

### WELLHEAD PROTECTION PROGRAM

**SCOPE:** This policy includes the industrial well located in the roadway between the north and south Hackman parking lots used for irrigating the athletic fields. It also includes the industrial well located between Esbenshade and Musser on the north side used to provide water to the aquatic life in Biology.

**PURPOSE:** This policy is intended to control processes and/or activities that may occur in the vicinity of the two wells and that may cause water contamination in either well.

**WELL DISPOSITONS:** Neither well is connected to or contributes to a public water supply. Both wells are considered industrial wells.

#### **PROCESS:**

- ◆ Care will be taken to keep fertilizers out of the wells
- ◆ Fuels will not be stored within 100' of the wells
- ◆ Care will be taken when conducting maintenance operations in the vicinity of the wellhead
- ◆ The gradients in the vicinity of the well heads will be considered when conducting activities/processes that have the potential of causing contamination in the wells
- ◆ To the extent possible, provide a seal on the manhole cover protecting the well used to irrigate the athletic fields

#### **RESPONSIBILITIES:**

- ◆ Grounds personnel will consider the impact on the wells when applying fertilizers and pesticides
- ◆ Plant Operations will consider the impact on the wells when building or renovating. Additionally they will inform outside contractors of the presence and exact location of the wells when the proposed work could adversely affect the wells.
